

Make the imagined.

robo APP

Smart mobile app

What you'll love about the Robo app from Robo 3D

Use the Robo app to control your 3D printer right from your phone and download your 3D models with direct access to Dropbox and Google Drive.

Robo app features

Multiple printers, one app

Control multiple prints and printers at once with one mobile app.

Cloud storage integration

Connect to cloud based libraries and access thousands of 3D models.

In app purchase

Purchase filament, accessories, print kits, and more right from the app.

Monitor print progress

Watch the progress of your print, see bed and extruder temperatures, and even pause and cancel prints right from your phone.

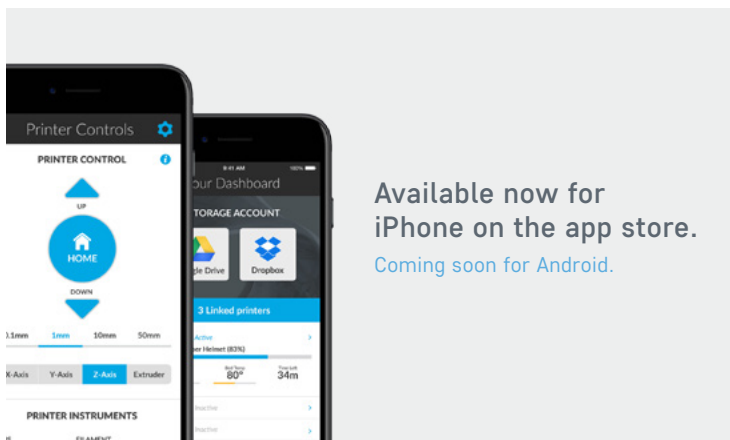

On board camera

Record your prints in real time, watching them come to life right on your phone.

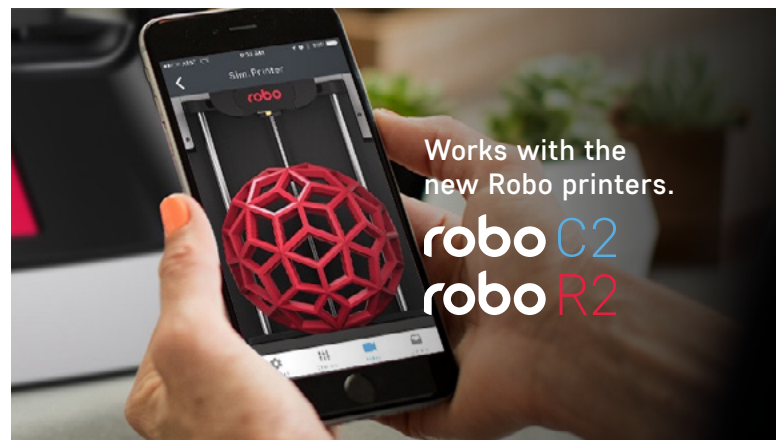

App support and guides

View getting started guides and the Robo support center right from the app.

Available now for
iPhone on the app store.
Coming soon for Android.

Works with the
new Robo printers.
